

*The following procedure requires the **Optional Wi-Fi Module** to be installed and the **Wi-Fi option** enabled in the configuration settings. If your heater does not have the option fitted please contact the Service Department to arrange to purchase the hardware and software upgrade.*

Setting up your Phone with Your Heater

1) Download the Smart Stove NS App

Scan this QR code

OR type into your phone's browser

<https://testapp.tuya.com/smartstove?version=1.0.4>

and download the NS App to your phone.

2) Register an account

Open the App  into the register/login interface. You can register by email or mobile phone number. Input the phone number or Email address and receive a verification code to register. Enter the code, once registered, login to your account.

3) Add a new device (EZ Mode)

- Log into the NS App and select the + Icon on the top right of the App to add a device.
- Select the Pellet Stove Icon.
- While the heater is NOT burning, turn the pellet heater OFF at the power point wait 10 seconds then turn the power back on.
- Press and hold the button on the back of the heater Display Module for about 2 seconds until the yellow/red led on the back of the display starts blinking.
- Ensure the indicator light is flashing which indicates that the heater is in config mode and press the Confirm button on the App.
- Enter your Wi-Fi password when prompted to by the app and wait for the heater and the app to be connected.

You are now ready to control your heater from the NS App. For further help, select the Me option at the bottom right and go to the Help Centre.
